Joint Memo MPS Erini / IPCC SIO Stockwell 2

IPCC Access to K59 Op. Erini.

Access to documentation on Erini is being provided to Mr. Mike Grant of the IPCC who is asked to note that the vast majority of the documents are already in possession of the IPCC. Action results are effectively notes of the staff involved in the actions and the reports created by Erini contain conclusions that are not always factually based. Such reports often contain assessments by the PTSO, such assessments are not the conclusions of the MPS or other members of the Erini team but those of the PTSO.

The vast majority of the documentation has little or no direct relevance to Stockwell II. This account is unique in its purpose and design and as such it contains documentation that has no relevance to Stockwell or the Shooting of Jean Charles De Menezes. Some documentation is sensitive and classified, reliance is placed on the IPCC for confidentiality in respect of the access provided.

It should also be noted that in respect of Operation Erini the only access to the account is from the HOLMES II terminals in room 823 New Scotland Yard. The only MPS employees with access are those on the Erini Team shown on D1. None of the team are authorised to take documents from Room 823 or divulge information from the account without the specific instructions of the PTSO.

Nobody outside of the MPS has been provided with access to the account. The IPCC are requested to apply the same secure approach.

DCS David Begg

PTSO
