Lambeth borough:

Lambeth borough is currently piloting a new model of response policing that aims to maintain or enhance emergency response whilst at the same time delivering a better service on non-emergency calls.

This has led to the creation of smaller but specialised emergency response teams, dealing solely with Immediate (I) and Significant (S) response. Officers released from existing response teams have been deployed, primarily, in Local Policing Teams (LPT), available to support Safer Neighbourhoods teams or for other borough duties.

Therefore the work of Safer Neighbourhoods Teams has been supplemented with additional responsibilities. This means that the individual teams are larger. In the course of creating this model, Lambeth has already made savings in terms of Sergeants and as a consequence no further savings are required from Safer Neighbourhoods Sergeants at this stage.
