

Audit and Inspection Strategy

By positively engaging with audits and inspections, the MPS will learn and improve the delivery of quality policing in a diverse world city.

The Audit and Inspection Strategic Objectives are to use audit and inspections to:

- improve our services;
- ensure the best use of resources;
- support public accountability;
- provide business assurance to senior management.

These objectives will be achieved by:

- adopting a consistent approach to all audit and inspection services;
- ensuring an effective and consistent response to audit and inspections across the MPS;
- ensuring appropriate internal quality assurance systems and structures are in place to support the MPS;
- ensuring lessons learnt from audit and inspections are reflected in the MPS's corporate planning and performance processes;
- maintaining effective communication between the MPS and audit and inspection services;

monitoring the delivery of agreed programmes and the management response to individual audits and inspections.
