

Each graph displays the number of Street Crime allegations (DI & DG) recorded during the 16 week period from 10th December to 31st March. The blue line with triangles is the year 2000/01 while the black line with diamonds is 2001/02. As each week of the operation passes the number of allegations will be updated on the graph.

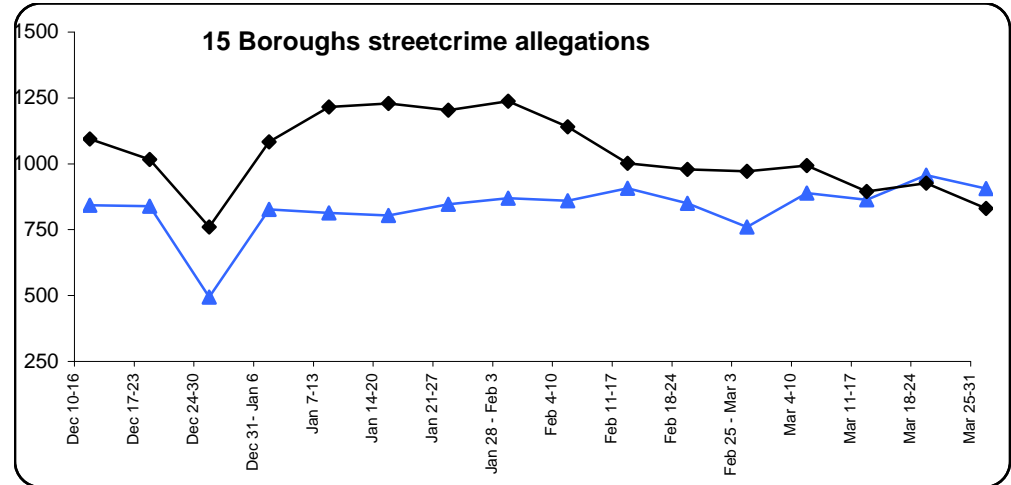

MPS	Average									
	Pre Week	Wk1	Wk2	Wk3	Wk4	Wk5	Wk6	Wk7	Wk8	PTD
Allegations 00-01	1051	1162	1230	1188	1060	1197	1174	1286	1270	1196
Allegations 01-02	1472	1494	1332	1351	1332	1395	1209	1279	1133	1316
% increase	40%	29%	8%	14%	26%	17%	3%	-1%	-11%	10%

The table below the graph shows Street Crime allegations in numerical form, and will compare the weeks of the operation against the same weeks last year. The "Average Pre Week" is the average weekly number of allegations over the 8 weeks prior to the operation. The "% increase" compares the eight week period within year 2000/01 against 2001/02 and shows the % rise in allegations over that period. If the figure is in green, it is lower (better) than the "Average Pre Week" %, if in red it is higher (worse) than the "Average Pre Week" %. Each week of the operation will be compared in the same way against the same week last year. "PTD" means performance to date and will display the average week during the period of the operation.

"Variation" compares the number of clear-ups for that week against the "Average Pre Week".

"Variation to date" compares the average weekly number during the operation against the "Average Pre Week"

Variation in green is better than the "Average Pre Week", red is worse.
